PROFESSIONAL SUMMARY

Software Developer with 4 years of experience in HTML, CSS, Sass, TailwindCSS, JavaScript, TypeScript, React and Next.js. Specialist in the creation of scalable and responsive applications, with a focus on performance, accessibility and SEO. Experience with Redux and Recoil for state management and API integration using Apollo Client and REST. Solid knowledge in Node.js, Prisma, GraphQL (Apollo Server) and MySQL for Back-end development. Knowledge of Git, GitHub and Vercel for version control and deployment.

PROFESSIONAL EXPERIENCE

Software Developer | Mid-level | PD Case

Jul 2026 – Today

- Support and update of the agency's Internal Portal, ensuring high availability and support for a base of 3000+ active users.
- Direct action in the development life cycle (construction, testing and optimization) of high-impact features, such as payroll systems, granting benefits and evaluating the employee performance.
- Creation of scripts and prototypes of service interfaces using HTML5, CSS3 and JavaScript, with integration and consumption of RESTful APIs.
- Construction of complex queries in MySQL for extraction and cross-referencing of institutional data, registration and performance metrics.
- Acting in agile squads with daily dynamics of Scrum and Kanban, using Redmine to monitor sprints, control deliveries and manage deadlines.

Software Developer | Mid-level | G4F

Nov 2026 – Jul 2026

- Intensive use of **HTML**, **CSS**, **Javascript** and consumption of **REST APIs** in the elaboration of scripts and prototyping of service screens.
- **Maintenance** and **updating** of the Service Portal of the contracting agency, serving **more than 2,500 active employees**.
- Preparation of queries in **MySQL databases**, accessing information from performance evaluations, people records and other institutional data.
- Collaboration in the **development**, **testing**, and **enhancements** of new features, including critical functionality such as benefits pay, payroll, and server evaluation.
- Daily participation in agile ceremonies (**Scrum** and **Kanban**), using **Redmine** to control tasks, deadlines, deliveries, sprints and planning.

Software Developer | Internship | Ministério Público do Estado do Ceará

Mar 2025 – Oct 2025

- Expertise with **HTML**, **CSS** and **JavaScript** in development tasks and front-end adjustments, ensuring adherence to good usability and responsiveness practices.
- Elaboration of **test scripts**, based on the **requirements** defined by the customers, ensuring the **coverage** and **quality of deliveries**.
- Analysis of **technical documentation**, including **class diagrams**, **flowcharts** and **specifications of functional requirements**, ensuring the correct understanding of demands.
- **5 services** developed and **implemented in production** on the agency's Internal Portal.
- **Maintenance** and **improvement** of internal and customer systems, using the **SYDLE ONE** digital platform as a basis for operations.

- Active participation in **agile ceremonies**, such as **daily meetings (dailies)**, **weekly** and **monthly**, contributing to goal setting, monitoring of deliveries and retrospectives.

Web Developer | Freelancer

Oct 2023 – Today

- Development of on-demand web applications for companies, including virtual catalogs and interactive platforms, using **React**, **Next.js**, **TypeScript** and **TailwindCSS**.
- Implementation of responsive and optimized design for different devices, with a focus on **UI/UX** and **accessibility**.
- Integration of **REST** and **GraphQL APIs** (**Apollo Client** and **Apollo Server**) for dynamic data consumption.

TECHNICAL SKILLS

- **Front-end:** HTML, CSS, Sass, TailwindCSS, JavaScript, TypeScript, React, Next.js, Redux, Recoil.
- **Backend:** Node.js, GraphQL (Apollo Server).
- **Database:** MySQL.
- **Tools:** React Router, Axios, Prisma, Supabase, Git, GitHub, Vercel, Microsoft Excel.
- **Others:** Agile methodologies, SEO, Accessibility, Single Page Applications (SPA).

MAIN PROJECTS

Internal system - Norimaq | Full-stack | Typescript • Next.js • Node.js • Supabase

- Service Order control system.
- Generation of history and customized reports for the Production Manager.
- Duration control by sector and misplacement/loss of parts.
- 12 sectors registered and active on the platform.
- 10+ Reports generated.

Wedding Platform | Full-stack | TailwindCSS • Typescript • Next.js • Apollo Client

- Commemorative royal site for wedding event with more than 150 guests.
- Gift list with QR Code for PIX and dynamic data via GraphQL.
- RSVP integrated with the Google Sheets API.

API – Wedding Platform | Backend | Typescript • Node.js • GraphQL • Apollo Server

- Proprietary GraphQL API to manage confirmations and gifts.
- Integration with Google Sheets for automatic tagging of confirmed guests.

Unicapas® | Front-end | TailwindCSS • Typescript • React | <https://unicapas.com.br/>

- Virtual product catalog.
- Real project for the motorcycle accessories company Unicapas®.
- Solid SEO and UX/UI.

EDUCATION
